## TABLE I.

### AREA, HOUSES AND POPULATION.

This table shows for each district and state the area, the number of towns and villages, the number of occupied houses, and the total urban and rural population, male and female. The districts are arranged, in this and other tables, in the order of administrative divisions.

2. The area of some units shown in this table differs from that shown in the corresponding table for 1921. This is due in most cases to the inter-provincial and inter-district transfers referred to in the title-page of Table II. Apart from such transfers, Balasore district suffered a loss of 30 square miles during the last decade through coastal erosion; while the area of Manbhum district was found, as a result of the cadastral survey, to be 52 square miles less than the area formerly shown.

3. "*Towns*" in columns 3 and 6 means places treated as towns or cities for the purposes of Tables IV and V, and "*urban*" in columns 9, 12 and 15 means persons enumerated in those places. For the treatment of cantonments, large railway settlements, civil lines adjoining municipalities, etc., the title-page of Table IV may be seen.

4. "*Villages*" in columns 4 and 7 means *revenue* villages, or *mauzas*, other than (i) those which are wholly absorbed in towns, and (ii) those which on the night of the census contained no population. "*Rural*" in columns 10, 13 and 16 means persons enumerated elsewhere than in towns.

5. "*Houses*" in columns 5—7 means census houses. For a discussion of the definition of this term, see the closing paragraphs of Chapter I of the Report volume. Briefly, the census house is the dwelling-place of the commensal family; but any non-residential building which contained a single individual on the census night was also reckoned as a "house".

6. Provincial Tables I and II at the end of this volume show for each revenue thana a few of the main statistics, such as area, population, density, literacy and distribution by religion. Provincial Table II shows also statistics of population and religion for each police-station.

**TABLE II.**

**VARIATION IN POPULATION DURING THE LAST FIFTY YEARS.**

This table compares the population of each district and state as returned in 1931 with that returned at the five previous censuses. The figures for the previous censuses differ in some cases from those given in the old census reports. This is due to transfers of area from one district to another or from one province to another. Adjustments of population have been made on account of all such transfers, so that the figures given in this table for previous censuses represent the population then enumerated within the boundaries of the districts and states as now constituted.

2. Since 1921 several minor inter-provincial transfers of area have taken place between this province on the one hand and the United Provinces and Bengal on the other hand. Most of the areas so transferred were uninhabited and the population figures were therefore unaffected. Adjustment of population was necessary in the following cases only :—

(1) Thirteen inhabited mauzas were transferred from the Santal Parganas (Bihar) to the district of Malda (Bengal). The total population of these mauzas in 1921 was 6,948 persons, of whom 3,438 were males and 3,510 were females.

(2) One mauza (Baratabari), which was formerly included in the Bengal district of Malda, is now administered as a part of the Bihar district of Purnea. Conversely, one mauza (Garra), which formerly belonged to Purnea, is now being administered as a part of Malda. The formal transfer of these villages had not been sanctioned when the census took place, but they were actually enumerated as if it had been, and the population of Purnea district at previous censuses has been adjusted accordingly. The population in 1921 of Baratabari was 247 persons (133 males and 114 females) and that of Garra was 70 persons (36 males and 34 females).

3. In addition to the inter-provincial transfers mentioned above, the following transfers of population were made during the last decade between districts of this province :—

### TABLE III.

#### CITIES, TOWNS AND VILLAGES

##### CLASSIFIED BY POPULATION.

For the definition of "*towns*" (including cities) and "*villages*" the title-page of Table I may be seen. In this table, as in Tables IV and V, cantonments have been treated as entirely separate units, while the suburban areas adjoining the municipalities of Patna, Ranchi, Katihar, Dhanbad and Chakradharpur have been treated as forming an integral part of the parent town.

2. In this table the floating population enumerated in encampments, boats, trains, etc., has been excluded from the population of specific towns and villages and has been shown separately in the last column; whereas in Tables IV and V such persons have been included in the population of the town within which they were actually enumerated. This accounts for certain apparent discrepancies between the tables.

# TABLE IV.

## TOWNS CLASSIFIED BY POPULATION

WITH VARIATION SINCE 1881.

This table shows the population of towns at each of the last six censuses, and the distribution by sex at the last three.

2. For the purposes of the census a "town" includes every municipality and every cantonment, irrespective of their size, and every other continuous collection of houses which, although not under municipal government, has been selected for treatment as a town with regard to the number and character of its population, the relative density of its dwellings, its importance as a trade centre and its historic associations. The numerical test ordinarily applied is that a town must have not less than 5,000 inhabitants, but this rule is not invariable. At the present census three places with a population below 5,000 were considered to be sufficiently urban in character to justify their treatment as towns, while quite a large number of places with more than 5,000 inhabitants were not so treated.

3. Four towns (Fatwa, Jugsalai, Bolangir and the cantonment at Muzaffarpur), with an aggregate population of 24,824, appear for the first time in this table and in table V; while one place (Sherghati), which in 1921 was treated as a town and had a population of 4,271, has been excluded on the present occasion. Consequently the variation in the aggregate population of places which were treated as towns at *both* censuses is not the figure given in the first line of column 10 of this table, but is 268,929.

4. The population of the New Capital at Patna, of the area at Ranchi administered by the Doranda Notified Area Committee, and of the railway settlements at Katihar, Dhanbad and Chakradharpur have been included in the population of the adjoining municipalities, although they do not actually fall within municipal limits. Sub-totals for these suburban areas have been shown in italics immediately below the main totals.

5. The cantonments at Dinapur and Muzaffarpur have been treated on this occasion as entirely separate "towns" and have been classified accordingly. Details of the civil and military population in these two cantonments are given below. The military figures represent those obtained from the census of "strictly military" area, and may contain a certain number that should properly be reckoned as civil, and *vice versa*.

NAME OF CANTONMENT.				POPULATION.	
				Military.	Civil.
Dinapur .. ..	..	..	..	1,145	9,072
Muzaffarpur ..	..	..	..	129	108
TOTAL .. ..	..	..	..	1,274	9,180

6. The towns in this table have been grouped into six classes in accordance with their population in 1931. The population recorded for each town at the previous censuses has been repeated without any attempt to adjust the figures so as to allow for changes of area. The former population of places newly treated as towns has not been shown.

7. The totals given for each class represent the whole urban population recorded at successive censuses *for that class*. Consequently the class totals are not, except for 1931, the totals of the figures immediately below them. Similarly, the total urban population of the province at previous censuses is not necessarily the total of the individual towns shown in this table, seeing that (as already stated) some places formerly treated as towns no longer appear in the table.

*Note.*—The procedure adopted on this occasion, as explained in the last paragraph, represents a departure from that adopted in 1921.

TABLE V.

TOWNS ARRANGED TERRITORIALLY  
WITH POPULATION BY RELIGION.

This table shows the territorial distribution of the urban population by religion. The towns are arranged in each district in the order of their population.

2. For the definition of "town" the title-page of table IV should be seen; also for an explanation of the treatment accorded to the New Capital at Patna, Doranda at Ranchi, certain railway settlements not included within the limits of the municipalities which they adjoin, and the cantonments at Dinapur and Muzaffarpur. Separate figures of military and civil population for these two cantonments are also given on the title-page of table IV.

3. The column for "Hindus" includes the following, returned as Brahmos and Aryas :—

**TABLE VI.**  
**BIRTHPLACE.**

This table, which corresponds with Table XI of 1921, shows the birth-places of the population enumerated in the province. It is divided into two parts. Part I contains the statistics for the province as a whole and for the various districts and states; while Part II gives similar information for the four cities.

2. In Part I birthplaces returned by small numbers of persons have been clubbed together in their respective classes. Details of these are given below :—

1. The first part of the report is a general statement of the purpose and scope of the study. It is followed by a brief review of the literature on the subject. The second part of the report is a description of the methods used in the study. This includes a description of the subjects, the instruments used, and the procedures followed. The third part of the report is a presentation of the results of the study. This includes a description of the data collected, a summary of the findings, and a discussion of the implications of the findings. The fourth part of the report is a conclusion and a list of references.

### AGE, SEX AND CIVIL CONDITION.

This table shows the distribution of the population by age, sex and civil condition. It is divided into three parts. Part I shows the distribution, for the whole province (including the Feudatory States), of the total population and of each religion. Part II shows the distribution, for each district and for the states, of the total population and of the (numerically) most important religions. Part III gives similar information for cities. In Parts II and III the age statistics are given in less detail than in the provincial summary.

2. The age-groups are shown as 5—10, 10—15 and so on. The second figure of each group denotes the age *not yet reached*. For instance the group 5—10 includes all persons aged 5, 6, 7, 8 or 9 years, but not those aged 10. The age of each person was reckoned from the *nearest* birthday, and not (as in 1921) from the number of *completed* years.

3. Divorced persons have been entered as "widowed". Persons recognized by custom as married have been shown as such, even though they have not gone through any formal ceremony.

**TABLE VIII.**  
**CIVIL CONDITION BY AGE.**  
**FOR SELECTED CASTES AND TRIBES.**

This table contains statistics, for selected castes and tribes, similar to those given in Table VII for the whole population. The age periods, however, are different in the two tables. In this respect again the present table differs slightly from Table XIV of 1921, with which it otherwise corresponds in form.

2. In the case of some of the selected castes, etc. complete statistics for the whole province have been shown ; in the case of others the statistics are for representative localities only. But in both cases the *natural* (and not the *administrative*) division has been taken as the unit of locality. The districts and states falling within each natural division of the province are reproduced below from Chapter I of the report volume :—

**TABLE IX.**  
**INFIRMITIES.**

This table, which corresponds with Table XII of 1921, shows the distribution (1) by age and (2) by locality of persons suffering from insanity, deaf-mutism, total blindness and leprosy.

2. Persons suffering from more than one infirmity have been shown separately under each head, but they have been counted only once in the columns for "Population afflicted". Hence the figures in the latter columns do not agree exactly with the sum of the figures for the several infirmities. The following statement gives particulars of persons suffering from more than one infirmity :—

			Persons.	Males.	Females.

**TABLE X.**

**OCCUPATION OR MEANS OF LIVELIHOOD.**

In this table all occupations returned at the census have been classified according to a scheme which comprises 4 main classes, 12 sub-classes, 55 orders and 195 groups. (Order no. 1 is further divided into 5 sub-orders.) This scheme differs but little from the one adopted at the last census, but in other respects there are important differences between the present table and the corresponding table (XVII) of 1921. The main points of difference are briefly indicated below :—

- (a) In 1921 the total population was divided into “actual workers” and “dependants”. On the present occasion it has been divided into “earners”, “working dependants” and “non-working dependants”.
- (b) Against each occupation in 1921 was shown the total number of persons *supported* by it—i.e., both workers and dependants. This time only persons actually *following* an occupation, either as earners or as working dependants, have been shown against it, and no attempt has been made to distribute the non-working dependants between the various occupations by which they are supported.
- (c) In 1921 the *principal* occupation only of each person was shown, except in the case of those persons whose subsidiary means of livelihood was agriculture. On this occasion an attempt has been made to record the subsidiary occupations of all persons who had more than one means of livelihood.

2. The table is divided into two parts. Part I contains complete statistics for each class, sub-class, order and group, separate figures being given for (a) the province as a whole, (b) British territory, and (c) the Feudatory States. Part II gives similar information in detail for each district and state, as well as for the four “cities”; but in this part groups which are numerically unimportant have not ordinarily been shown.

\* Persons undergoing rigorous imprisonment in jails have been treated as "working dependants". All other inmates of jails, asylums, etc., have been treated as "non-working dependants".

## TABLE XI.

### OCCUPATIONS OF SELECTED CASTES, TRIBES OR RACES.

In this table, which corresponds with Table XXI (Part A) of 1921, the occupations of the selected castes, etc., are grouped together by "sub-classes" (*vide* scheme of classification of occupations in Table X). The more important sub-classes have been divided up into smaller units, but these units do not always coincide with the "orders" and "groups" of the main occupation table. Columns 17—66 record the principal occupation of all *earners* (as distinct from working dependants) who are not accounted for in columns 9 and 10.

2. As in Table VIII, complete figures for the whole province have been given for some of the selected castes, etc., while in the case of others the statistics are for representative localities only. The *natural* (as opposed to the *administrative*) division has been taken as the unit of locality. The districts and states falling within each natural division of the province are given on the title-page of Table VIII.

**TABLE XIII.**

**LITERACY BY RELIGION AND AGE.**

This table, which corresponds with Table VIII of 1921, deals with the literacy of the population classified by religions and age-periods. As in 1921, the test of literacy was the ability to write a letter to a friend and to read the answer to it. No person below the age of 5 years was treated as literate. Persons literate in English have been shown separately, but they are included also in the columns for ordinary literates.

2. In general arrangement the table closely follows Table VII, except that only five age-periods are shown.

3. Out of the total Christian population, 403,708 persons (199,910 males and 203,798 females) are Indians by race, and 13,018 persons (7,275 males and 5,743 females) are non-Indians, *viz.*, Europeans, Anglo-Indians, etc. The following statement shows separately for Indian Christians and other Christians the number of literate persons and of those who are literate in English :—

## TABLE XIV.

### LITERACY BY SELECTED CASTES AND TRIBES.

This table, which corresponds with Table IX of 1921, gives for certain selected castes and tribes statistics of "literacy" in the sense in which that term is used in Table XIII. The statistics exhibited in the present table are confined to persons aged 7 and over, both in the case of the literate and of the illiterate population.

2. Figures for the "depressed classes" are given first (the significance and scope of this term are discussed in a special appendix to the report volume), and these are followed by figures for various other castes and tribes representative of the different strata of society. In the case of certain castes, etc., complete statistics for the whole province have been shown (and this course has been followed as far as possible for all the depressed classes)—while in the case of certain other castes, etc., the statistics are for representative localities only. Throughout, the *natural* (as opposed to the *administrative*) division has been taken as the unit of locality. The districts and states falling within each natural division of the province are specified on the title page of Table VIII.

# TABLE XV.

## LANGUAGE.

This table, which corresponds with Table X of 1921, is divided into two parts. Part I shows the languages spoken as mother-tongue by the population enumerated in the province. These languages have been arranged under the following heads—

- (1) Indo-Aryan languages. (4) Other languages of India.
- (2) Munda languages. (5) Asiatic (non-Indian) languages.
- (3) Dravidian languages. (6) European languages.

2. Part II of the table, which deals with bi-lingualism, is new. It represents an attempt to show the extent to which subsidiary languages are used in common, everyday life in addition to (and sometimes largely in supersession of) the mother-tongue of the speakers concerned. Particular attention has been paid to the cultural zones in which important vernaculars are found side by side or overlapping one another, and in such areas the subdivision, instead of the district, has ordinarily been taken as the unit of bi-lingualism. In each unit those languages only have been treated as "subsidiary languages" which are really in common use in that particular locality.

3. Any individual using two (or more) subsidiary languages has been counted as two (or more) persons in the statistics of bi-lingualism. This accounts for the fact that in very rare cases the sum of the persons shown as using different languages subsidiary to a single mother-tongue may actually exceed the total number of persons speaking that mother-tongue.

4. Languages which are spoken (as mother-tongue) by a comparatively small number of persons have been clubbed together in their respective classes in both parts of the table. The statement below gives details of these languages according to the grouping in Part I :—

TABLE XVI.

## RELIGION.

This table shows the distribution of the population by religions. It corresponds with Table VI of 1921, from which it differs in form in the following respects :—

- (1) The term "Animist" has been replaced by "Tribal" (in this and in all the other tables where distribution by religion is shown) to denote the religion of the primitive tribes.
- (2) Christians have been classified as Roman Catholics and other sects. Table XV of 1921 showed a detailed classification of Christians by sect and race ; but no such table has been prepared on the present occasion.

2. "Brahmanic" is a term used, for the sake of convenience, to denote Hindus who do not belong to the Brahmo Samaj or the Arya Samaj. It includes the following number of persons returned as Deo Samajists and Adi-Hindus.

Sect and locality.	Persons.	Males.	Females.	Sect and locality.	Persons.	Males.	Females.
Deo-Samaj ... ..	16,694	8,749	7,945	Adi-Hindu ... ..	525	243	282

## TABLE XVII.

### RACE, TRIBE OR CASTE.

This table corresponds with Table XIII of 1921, but is presented in a different form. It gives statistics of the more important and numerous castes and tribes found in the province. For reasons of economy the tabulation of caste was restricted at this census, and several of the communities for which figures were shown in 1921 do not appear in the present table. On the other hand certain new communities figure in it. For example, an attempt has been made to obtain more or less complete figures for all "depressed classes" in the province, and these statistics are discussed in an appendix of the report volume. Special attention was paid, too, to the primitive and "semi-primitive" tribes, and detailed figures have been presented in Table XVIII of the territorial distribution of some of these tribes and the variation in their numbers during the last forty years. Apart from the depressed and primitive communities, the present table gives statistics of all castes which numbered not less than 1 *per cent.* of the provincial population in 1921, as well as of some other castes which are of importance in limited areas.

2. The total figure shown against each caste or tribe in this table cannot always be regarded as absolutely complete, because in localities where a particular caste was believed to be more or less unknown no attempt was made to extract statistics for it. This, however, does not apply to those castes which are found in considerable numbers throughout the province.

3. Below the total figures for each caste, etc. (other than those dealt with in Table XVIII) detailed figures are given for the districts in which it is chiefly found. As a rule, a district is mentioned only when the caste contributes not less than one *per mille* to the total population of the district; but this rule has not been strictly followed in the case of the less numerous castes.

4. *Jolahas* are the only purely Muslim community shown in this table. But, in the case of *Doms*, *Halalkhors* and *Lalbegis*, some of whom were returned as Hindus and some as Muslims, separate totals are given for each religion.

5. Christian converts from Hinduism and Islam do not ordinarily make any return of "caste" other than a simple return of Indian Christian. But the figures shown in this table for the various primitive tribes include converts to Christianity and Hinduism as well as the adherents of the old tribal religions; and here again separate totals have been shown for each religious group. In parts of the Chota Nagpur plateau, such castes as *Gaura* and *Kamar* have been treated for this purpose in the same way as the primitive communities.

6. Religious communities such as Sikhs, Jains, Buddhists and Zoroastrians, who do not ordinarily recognize caste distinctions, have been excluded altogether from this table. The same applies to Europeans, Anglo-Indians, etc. No return of caste was ordinarily made by members of the Brahmo, Arya or Dev Samaj. Apart from these particular Hindu sects, there were 6,743 Hindus (3,146 males and 3,597 females) who declined, or omitted, to make any declaration of caste.

7. In all, 33,934,751 persons, or more than 80 *per cent.* of the total population of the province, have been accounted for in this table. The statement below gives separate figures for the four main religious groups. Brahmos, Aryas and Dev Samajists, and persons who made no return of caste at all, have been excluded from the total Hindu population in this statement.

### TABLE XVIII.

#### VARIATION OF POPULATION OF SELECTED TRIBES.

This is a new table, showing in detail the territorial distribution of the more important aboriginal and semi-aboriginal tribes of the province, and the variations in their numbers during the last forty years.

2. Where statistics are given for localities smaller than a district, the unit of locality adopted is the *revenue thana*, except in those cases where it is expressly stated to be the subdivision.

## TABLE XIX.

### EUROPEAN AND ALLIED RACES AND ANGLO-INDIANS

BY RACE AND AGE.

This table, which corresponds with table XVI of 1921, is divided into two parts. The first part relates to European and allied races, and distinguishes between British subjects and others ; while the second part relates to Anglo-Indians, *i.e.*, persons of mixed race. Statistics for cities have been shown separately, but these statistics are also included in those of the districts to which the cities belong.

2. Armenians have been included among "European and allied races", and separate figures for persons who described themselves as Armenians by race have not been extracted. But 91 persons (55 males and 36 females) returned Armenian as their mother-tongue, mostly from Manbhum district.

3. All the persons shown in this table returned themselves as Christians except 9 (7 males and 2 females), who returned "indefinite" religious beliefs, *viz.*, agnostic or atheist.

## PROVINCIAL TABLE II.

### POPULATION OF REVENUE THANAS AND POLICE-STATIONS BY RELIGION AND LITERACY.

This table shows the total population of each revenue thana and police-station jurisdiction, and the distribution of that population between the five main religious groups. For each revenue thana the following additional information is given :—

- (i) The distribution of the Hindu population between (a) Brahmans, (b) Depressed classes and (c) Other Hindus.
- (ii) The number of literate persons in each religious group or sub-group.
- (iii) The total number of literate persons in the revenue thana, and their distribution between certain age-groups.
- (iv) The total number of persons in the revenue thana who are literate in English.

2. The literacy figures in this table differ slightly from those in Imperial Table XIII, as the latter table shows all persons aged 5 and over who were returned as literate, whereas no person below the age of 7 is shown as literate in this table.

3. The following castes and tribes have been treated as " Depressed classes " :—

Bauri	Ghusuria	Mahuria
Bhogta	Godra	Mangan
Bhuiya	Gokha	Mochi
Bhumij	Halalkhor	Musahar
Chamar	Hari	Nat
Chaupal	Irika	Pan
Dhobi	Kandra	Pasi
Dom	Kanjar	Rajwar
Dosadh	Kela	Siyal
Ghasi	Kurariar	Turi
